

CLAIMS

I claim:

1. A grip-enhancing material for application between a first object and a second object, comprising:
 - a base material with a first side forming a plurality of recesses therein
 - 5 defining a depth, said recesses formed at a density of approximately 180 to 300 per square inch, wherein said depth of said recesses is approximately 1/64 to 1/32 of an inch,
 - an adhesive located on a second side of said base material; and
 - wherein said first object contacts said adhesive and said
 - 10 grip-enhancing material engages said second object upon contact through suction and friction forces.
2. The grip-enhancing material of claim 1 wherein said recesses define diameters of approximately 1/64 or greater inches.
3. The grip-enhancing material of claim 1 wherein said base material is
- 15 constructed of polyurethane.
4. The grip-enhancing material of claim 1 wherein said adhesive is reusable.
5. The grip-enhancing material of claim 1 wherein said first object is a kitchen appliance.
- 20 6. The grip-enhancing material of claim 1 wherein said first object is a human body part.
7. The grip-enhancing material of claim 1 wherein said first object is a glove.
8. The grip-enhancing material of claim 1 further comprising a dispenser
- 25 for housing said grip-enhancing material.
9. The grip-enhancing material of claim 8 wherein grip-enhancing material is housed in the shape of a roll.
10. The grip-enhancing material of claim 9 further comprising a removable backing connected with said adhesive.

30 11. The grip-enhancing material of claim 1 wherein said base material is a pre-formed shape.

 12. The grip-enhancing material of claim 11 wherein said pre-formed shape is the shape of a finger.

 13. The grip-enhancing material of claim 11 wherein said pre-formed
35 shape is circular.

 14. A grip-enhancing material for application between a first object and a second object, comprising:

 a base material;

 a plurality of suction cups connected with a first side of said base
40 material formed at a density of 4 to 7 per square inch, said suction cups defining diameters of approximately 1/4 to 1/2 inches;

 an adhesive located on a second side of said base material; and

 wherein said first object contacts said adhesive and said
grip-enhancing material engages said second object upon contact through suction and
45 friction forces.

 15. The grip-enhancing material of claim 14 wherein said base material is constructed of polyurethane.

 16. The grip-enhancing material of claim 14 wherein said adhesive is reusable.

50 17. The grip-enhancing material of claim 14 wherein said first object is a kitchen appliance.

 18. The grip-enhancing material of claim 14 wherein said first object is a human body part.

 19. The grip-enhancing material of claim 14 wherein said first object is a
55 glove.

 20. The grip-enhancing material of claim 14 further comprising a dispenser for housing said grip-enhancing material.

 21. The grip-enhancing material of claim 20 wherein grip-enhancing material is housed in the shape of a roll.

- 60 22. The grip-enhancing material of claim 21 further comprising a
removable backing connected with said adhesive.
23. The grip-enhancing material of claim 14 wherein said base material is
a pre-formed shape.
24. The grip-enhancing material of claim 23 wherein said pre-formed
65 shape is the shape of a finger.
25. The grip-enhancing material of claim 23 wherein said pre-formed
shape is circular.
26. A grip-enhancing material for application between a first object and a
second object, comprising:
- 70 a base material;
 a plurality of suction cups formed at a density of 14 to 18 per square
inch, said suction cups defining a diameter of approximately 1/16 to 1/4 inches,
wherein each of said plurality of suction cups is connected with a first side of said
base material;
- 75 an adhesive located on a second side of said base; and
 wherein said first object contacts said adhesive and said
grip-enhancing material engages said second object upon contact through suction and
friction forces.
27. The grip-enhancing material of claim 26 wherein said base material is
80 constructed of polyurethane.
28. The grip-enhancing material of claim 26 wherein said adhesive is
reusable.
29. The grip-enhancing material of claim 26 wherein said first object is a
kitchen appliance.
- 85 30. The grip-enhancing material of claim 26 wherein said first object is a
human body part.
31. The grip-enhancing material of claim 26 wherein said first object is a
glove.
32. The grip-enhancing material of claim 26 further comprising a
90 dispenser for housing said grip-enhancing material.

33. The grip-enhancing material of claim 32 wherein grip-enhancing material is housed in the shape of a roll.

34. The grip-enhancing material of claim 33 further comprising a removable backing connected with said adhesive.

95 35. The grip-enhancing material of claim 26 wherein said base material is a pre-formed shape.

36. The grip-enhancing material of claim 35 wherein said pre-formed shape is the shape of a finger.

100 37. The grip-enhancing material of claim 36 wherein said pre-formed shape is circular.

38. A grip-enhancing material for application between a first object and a second object, comprising:

a base material;
a plurality of suction cups connected with a first side of said base material, each of said plurality of suction cups defining a diameter of 1/8 to 3/16 inches and arranged adjacent to at least one suction cup;
an adhesive located on a second side of said base material; and
wherein said first object contacts said adhesive and said grip-enhancing material engages said second object upon contact through suction and friction forces.

110 39. The grip-enhancing material of claim 38 wherein said base material is constructed of polyurethane.

40. The grip-enhancing material of claim 38 wherein said adhesive is reusable.

115 41. The grip-enhancing material of claim 38 wherein said first object is a kitchen appliance.

42. The grip-enhancing material of claim 38 wherein said first object is a human body part.

120 43. The grip-enhancing material of claim 38 wherein said first object is a glove.

44. The grip-enhancing material of claim 38 further comprising a dispenser for housing said grip-enhancing material.

45. The grip-enhancing material of claim 44 wherein grip-enhancing material is housed in the shape of a roll.

125 46. The grip-enhancing material of claim 45 further comprising a removable backing connected with said adhesive.

47. The grip-enhancing material of claim 38 wherein said base material is a pre-formed shape.

130 48. The grip-enhancing material of claim 47 wherein said pre-formed shape is the shape of a finger.

49. The grip-enhancing material of claim 48 wherein said pre-formed shape is circular.
